PROFESSIONAL SUMMARY

Proficient Python programmer specializing in deep learning algorithms and neural networks. Expertise in SQL database management and TensorFlow frameworks, optimizing project execution timelines. Focused on enhancing machine learning capabilities to drive innovative solutions.

WORK HISTORY

Python Developer (Remote), 12/2024 - 07/2025
W3Schools
- Integrated third-party APIs into existing software to improve functionality.
- Identified and rectified bugs in Python scripts, ensuring smooth workflows.
- Developed robust Python applications for improved business operations.
- Implemented data security measures for protecting sensitive information.
Machine Learning Apprentice, 01/2025 - 06/2025
FreeCodeCamp
- Analysed large and complex datasets whilst maintaining accuracy and quality of work.
- Identified valuable data sources and automated collection processes, leading to better informed decisions.
- Optimised image recognition software to improve user experience.
- Collaborated cross-functionally, ensuring alignment on machine learning objectives.

EDUCATION

HND, Electrical/Electronics Engineering, 11/2019 - 10/2024
Federal Polytechnic Nekede

SKILLS

Python language mastery, Python programming, Deep learning algorithms, Machine learning basics, Neural networks, SQL database management, Time efficiency, TensorFlow frameworks

SOFT SKILLS

Problem-solving, Communication

LANGUAGES

English

CERTIFICATIONS

1. Machine Learning with Python
2. Relational Database
3. Revisiting Python Essentials
4. Scientific Computing with Python
5. Machine Learning A-Z: AI, Python and R + ChatGPT Prize

AWARDS

In the course of my machine learning journey, I have been able to create workable projects that aid humanity.
